## About

Hi! I am a web developer capable of creating effective and creative solutions. I have a set of skills and competencies that make me the ideal candidate, such as teamwork, tolerance, and creating user-experience solutions. In each project I am involved in, I make sure to pay attention to every detail, striving for excellence. I am motivated by this new transition in my professional career, as well as continuously learning to adapt to new technological challenges. Thanks to the support and backing of organizations that believed on me and gave me the opportunity to educate myself alongside professionals, I have gained different technical knowledge and skills to successfully enter this new field.

## Educational Background

### Powercoders | Hack a Boss
