About

I am a web developer capable of creating creative solutions. I have experience in creating responsive websites using the Mobile First approach. I have skills in HTML5, CSS, JavaScript, Figma, UX/UI, and React, which allows me to work on a variety of web projects. I have a set of skills and competencies that make me the ideal candidate, such as teamwork, tolerance, and creating user-centered solutions. In each of the projects I am involved in, I make sure to pay attention to every detail, thus seeking excellence. I am motivated by this new transition in my professional career, as well as by constantly learning to adapt to new technological challenges.
